

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

NEW BEDFORD, MASS. :
E. ANTHONY & SONS, INC., PRINTERS.
1908.

This book list contains only the books added through the last eight years. In order to find other books you should consult the card catalogue on the north wall, or ask assistance at the information desk, or of the attendants. Every book in the library is listed in the card catalogue. A few words of explanation of that catalogue may help in its use.

It is arranged in one alphabet like a dictionary with cards for AUTHORS, TITLES of books, and books on SPECIAL SUBJECTS.

Thus you will find in the drawer marked Sid-Sis the books written by Sidney, Sir Philip; also books on Silk, and such titles as Silent Partner, Silent Places, etc.

In the arrangement of cards on a special subject, i. e., England, all the books which are descriptive are placed together, those written by Adams coming before those by Jones. The cards for historical books are similarly arranged.

In calling for a book, write on the slip everything which you find in the upper left hand corner of the card, as $\frac{018}{AM33}$ or 018-AM33.

If you remember an author, but not the title of the book you want, you will find all his books arranged under the author's surname, as, Curtis, Geo. W.

You will find books by their titles, looking for the initial letter of the first word (not a or the).

A little practice will render the use of the catalogue very easy.

Assistance will be gladly furnished by applying at the information desk.

The index on the next page will make clear the various subject divisions of this printed catalogue.

GEO. H. TRIPP, Librarian.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.5 billion to 2.2 billion.

There are a number of reasons why the world's population is growing so fast. One of the main reasons is that the number of children born to each woman has increased. This is due to a number of factors, including:

• The fact that women are having children at a younger age than in the past.

• The fact that women are having more children than in the past.

• The fact that women are having children more often than in the past.

• The fact that women are having children more often than in the past.

• The fact that women are having children more often than in the past.
